ABSTRACT

Cb

An elongate member (10) is provided having a first elongate portion (12), a second elongate portion (14) and an interconnecting joint (16). The interconnecting joint (16) is disposed at an acute angle to the first elongate portion (12) and rotation of the second elongate portion (14) about the interconnecting joint (16) allows a user access to an article (11) located at the upper end of the second elongate portion (14).
